AUTOPSY REPORT

Case No. 2023-2069

Name: Albert Garcia Age: 56 Sex: M

Date & Time of Autopsy: 13 Aug 2023 @ 8:00 a.m.

INTERNAL EXAMINATION

EXTERNAL EXAMINATION

The body is that of a 59 inch, 137 pound, normally developed, well-nourished adult male, who appears consistent with the listed age of 56 years. The body is received dressed in gray underwear beneath black athletic shorts and black socks. Around the right wrist is a white silicone bracelet and a white metal watch surrounds the left wrist. The body and associated clothing are covered in dirt.

The body is not embalmed and there are early changes of decomposition present including patchy skin slippage, easily broken rigor mortis and fixed ventral and dorsal lividity.

The gray scalp hair averages 6 inches in length. Gray facial hair is in the configuration of a mustache and goatee. The conjunctivae are moderately congested but without petechiae; the corneae are cloudy; and the irides are brown. The facial bones are intact to palpation. The upper and lower jaws are edentulous.

The neck, chest and abdomen appear normally formed and atraumatic.

The back is straight and atraumatic. The anus is patent and atraumatic.

The upper and lower extremities are examined. The fingernails are very short and intact. The right leg has been remotely amputated at the level of the mid right foot with an unremarkable scar along the stump. The left leg has been remotely amputated at the level of the mid lower leg and has a well-healed scar along the stump.

The external genitalia are those of an adult male and are atraumatic.

An illegible tattoo is on the medial right ankle.

Garcia, Albert

EVIDENCE OF MEDICAL INTERVENTION

Multiple EKG lead pads are on the body. Multiple bandages encircle the right upper arm and forearm and along the mid-medial right lower leg are two bandages.

EVIDENCE OF INJURY

Scattered about the ventral and lateral right arm are multiple ulcerations, all moist and erythematous, which measure up to 5 cm in greatest dimension and maximally extend into the superficial soft tissue.

Along the mid-medial right lower leg are two 1 cm-diameter moist and erythematous ulcerations that extend into the dermis.

Subsequent internal examination of the head, neck, chest and abdomen reveals no evidence of acute injury.

INTERNAL EXAMINATION

HEAD: The scalp is reflected and the cranial vault is opened. No fractures are seen. The dura is tough, white and pliable. There is no evidence of epidural, subdural or subarachnoid hemorrhage. The 1,500 g brain has glistening leptomeninges and appears normally formed. The parenchyma is moderately edematous and very soft with no evidence of intraparenchymal hemorrhage, infection, tumor or trauma. The cerebral vessels appear to have a normal distribution and are free of significant atherosclerosis.

NECK: The tongue is unremarkable. The hyoid bone and laryngeal cartilages are intact. The cervical spine is not fractured.

BODY CAVITIES: The body is opened with the usual Y-shaped incision. The organs occupy their usual positions and relationships and there are no abnormal fluid accumulations. No rib, spine or pelvic fractures are seen.

CARDIOVASCULAR SYSTEM: The 350 g heart has a smooth epicardial surface and a flabby configuration. Upon sectioning, the coronary vessels demonstrate no significant atherosclerosis. The myocardium is red-brown and soft with no obvious fibrosis. There is moderate dilatation of both ventricles. The endocardium and cardiac valves are diffusely red-purple and hemoglobin-stained but appear otherwise unremarkable.

The aorta is opened and reveals mild atherosclerosis and diffuse red-purple hemoglobin-staining.

RESPIRATORY SYSTEM: The right and left lungs weigh 820 and 780 g, respectively, and the right lung displays patchy pleural adhesions while the left lung has smooth pleural surfaces. Upon sectioning, the parenchyma is red-purple and atelectatic with mild edema but no obvious mass lesions. No pulmonary thromboemboli are identified.

GASTROINTESTINAL SYSTEM: The esophagus, stomach and small and large intestines appear unremarkable. The stomach contains a scant amount of tan fluid. The pancreas is normal in size, shape and anatomic location and demonstrates apparent fibrosis on sectioning with no mass lesions identified.

HEPATOBILIARY SYSTEM: The 1,870 g liver has an intact capsule and a tan-brown, diffusely fibrotic parenchyma with a micronodular architecture. No mass lesions are seen. The gallbladder is present and unremarkable.

LYMPHORETICULAR SYSTEM: The 660 g spleen is massive and has a blue-gray, intact capsule and an unremarkable parenchyma. A 3 cm-diameter accessory spleen is present within the adjacent mesentery.

GENITOURINARY SYSTEM: The right and left kidneys weigh 150 and 130 g, respectively, and have smooth cortical surfaces. The parenchyma is red-brown with blurred cortico-medullary demarcations. The collecting systems are not dilated. The urinary bladder contains a large amount of urine and has an unremarkable mucosa. The prostate gland is present and unremarkable.

ENDOCRINE SYSTEM: The thyroid and adrenal glands are normal in size, shape and anatomic location and demonstrate moderate autolysis upon sectioning.

*Based on the findings of the autopsy and CONCLUSION above,
in conjunction with the cause and manner of death.*

SCENE EXAM (If Applicable)

ARRIVE DATE/TIME : 8/12/2023 02:16 RETURN DATE/TIME : 8/12/2023 02:37 Scene Time : 21 Mins

SCENE PHOTOS : Yes TEMPERATURE : 94.4F SCENE TEMP CONTROL :

HUMIDITY : 82% RIGOR : Yes RIGOR JAW : ++

RIGOR ARMS : + RIGOR LEGS : + LIVOR MORTIS : Yes

LIVOR TYPE : Non Fixed LIVOR LOCATION : Back BODY TEMP : 92.1F

GENERAL SCENE OBSERVATION : The scene was located at the underpass of IH35 and Pendleton, San Antonio, Tx 78204. A blue tent and a large amount of trash was observed in the underpass of IH35 and Pendleton. A black wheelchair, two backpacks, along with food was observed to the front of the tent. The tent was observed to be opened. The decedent was observed to be lying supine inside the blue tent. The temperature of where the decedent was discovered was observed to be 94.4F. SAPD photo of the decedent's ID was seen on the SAPD computer.

POSITION : Upon BCMEO arrival, the decedent was observed to be lying supine in a tent. The head was tilted to the right side. The left upper extremity was bent at the elbow with the left hand resting on the chest. The right upper extremity was bent at the elbow with the arm extended horizontally. The left lower extremity was extended. The right lower extremity was bent at the knee and slightly extended.

CLOTHING EFFECTS : The decedent was clad in a black shirt, black shorts, and black socks x2. A white metal watch was observed on the left wrist. No other obvious clothing or personal effects were observed.

DECOMPOSITION & ARTIFACTS : No signs of decomposition was observed. Rigor was slightly present in the jaw, upper extremities, and lower extremities. Lividity was non-fixed and consistent with positioning. The decedent's body temperature was observed to be 92.1F.

TRAUMA : No deformities or crepitus were palpated of the skull. The bilateral eyes appeared congest and the oral frenula appeared to be intact. Bandages were observed around the right upper extremity. Apparent blood was observed on the bandage. A large apparent scar was observed on the right lower extremity.

OTHER OBSERVATIONS : The decedent was placed in a new sheet and body bag. Wrist tags were placed on the decedent and the bag was sealed with tag (#0031655). The case number was written on the body bag by this MI with the MI's badge number. No Rx medication, illicit substance, EtOH, or suicide notes were discovered on scene.

INCIDENT (If Applicable)

CIRCUMSTANCES OF INCIDENT : According to Ofc. Castillo (#101) with SAPD, the decedent was a 56yr old WM with a PMH of a left BKA. No other medical hx is known. Social hx consisted of heroin use. The decedent was homeless and resided in a tent at the address listed above with a friend (Mark Moutos).

According to the decedent's friend, on the morning of 08/11/23, the decedent injected himself with heroin. The decedent and the friend did not see each other for a few hours after that. He was last known alive at 2100hrs, when the decedent spoke to his friend. The decedent and the friend both decided to take a nap. At about 2200hrs, the friend woke up and saw the decedent still asleep. The friend left to go to the store and when he returned to the location on 08/12/23 at around 0030hrs, he saw the decedent still lying in the same position. The friend decided to check on the decedent and reported that the decedent was stiff but warm to the touch. The friend left to find a phone and contacted 911. SAFD was dispatched to the scene and pronounced the death at 0056hrs.

No concerns for abuse, neglect, no APS cases. No reported falls, accidents, trauma, foul play, or other injuries. No reported history of alcohol abuse.

No reported weapons, drugs, or drug paraphernalia at the scene.

Nicole Healy, #118	9/7/2023	No	No
Contacted Sabrina with APS who reported she is not a point of contact but the decedent was one of her cases. She reported he was a former ward of the county but has been chronically homeless since 1989. They were not able to find any family for the decedent and the decedent refused many outreach attempts.			
Nicole Healy, #118	9/8/2023	No	No
Listed number Jimmy Garcia is not a working number.			
Nicole Healy, #118	9/11/2023	No	No
The decedent has a record with UHS EPIC but the records has no encounters listed. His demographic information was homeless 1200 El Paso St which is a shopping center.			
Nicole Healy, #118	9/12/2023	No	No
Awaiting response from HFH to see if they has any additional information.			
Nicole Healy, #118	9/12/2023	No	No
Nothing in personal effects to help aid in finding NOK.			
Destiny Garcia	9/12/2023	No	No
Spoke with neighbor of the decedent, Greg Harmon, he stated that he would like to handle arrangements in the event that family is not found. 0841hrs			
Nicole Healy, #118	9/12/2023	No	No
Contacted SAPD Missing persons and the decedent is not reported missing person and there are no emergency contacts listed on his TX ID. The address SAPD had one file was 1310 McCullough SA, TX which is the address for Metro Methodist Hospital.			
Nicole Healy, #118	9/12/2023	No	No
Contacted Greg Harmon to see what his relationship to the decedent and if he could provide any additional information concerning his family. Greg reported he lived down the street from the decedent that and he and his wife were involved with getting the decedent into a residential home about a year ago but the deceased left the residence going back to the street citing physician abuse. Greg reported he was not familiar with the decedent's family or but stated he spoke with the decedent's camp mate Mark, who mentioned a possible grandmother who drives a truck but he couldn't provide any other information. Greg was asked if he would be willing to make funeral arrangements for the decedent is not family is found and he stated he would see what homeless organization he could contact to see what they would be willing to do. I informed Greg we are familiar with most of the homeless assistance programs and most all go through the county pauper burial program and he voiced understanding.			
Nicole Healy, #118	9/12/2023	No	No
HFH reported the decedent was last seen there in 2021 but was involved with Corazon Outreach. He was he had been residing at an assisted living facility in July 2023 and was living in a field of Pendleton/IH 35. She reported the decedent was seen at Texas Vista Medical Center (no longer operating). HFH also providing the following information: Mother Esperanza Falcon Garcia (204 Rosita SA, TX) who is around 97 years of so and has two older siblings.			
James L. Akers, #116	9/12/2023	No	No
Dec's mother was possibly NC08-7105. Her listed NOK is a son Robert Falcon. Found info on him in the Master Name Database and his name is listed as Robert Falcon Garcia, he would be the dec's brother or half brother. He, the dec, and the mother had shared addresses. Will work to notify him.			
Nicole Healy, #118	9/12/2023	No	No
Contacted Brittany Ackerson with Corazon Ministries and she confirmed she was knew the decedent though her street outreach. Once she gets back to her computer, she will pull up the decedent's information and see what information she can provide.

By signing below, I attest that I have confirmed the identity of the decedent and property to be the same as the case number listed above:

- Confirming that the case number listed on this form and on the arm bands is the case number reported to me by the BCMEO at the time of dispatch and/or pick up.
- Checking the decedent's arm band (if present) for the BCMEO case number and verifying that it matches the case number listed above.
- Checking any additional arms bands (as required) placed on the decedent at the BCMEO and verifying that the BCMEO case number matches any previous arm bands and the number listed above.
